Winter Sand for Residents

Winter sand is available for residents' personal use (and is not allowed for contractor use). Each residential dwelling is eligible for up to 10 gallons of sand per storm. No stockpiling is allowed. Taking pure rock salt is prohibited without approval from the Public Works Superintendent. The use of municipal sand for the sanding of private roads is prohibited.

The winter sand is available at the Department of Public Works yard, 18 Axelsen Rd, in the designated residential sand building (straight in and to the left). Public access is prohibited in the main sand/salt building.

Sand will be placed in the designated building as crews are available to do so. There will be times when sand will not be available. Sand for Residents is a convenience and is in no way a requirement of the Department of Public Works to provide. The best way to ensure ALL Residents have opportunity to take advantage of this convenience is to not abuse the privilege.
